A Grand Success

Care & Rehabilitation Expo China (CR EXPO) 2023, hosted by China Disabled Persons' Federation, was successfully held between 21-23 May 2023 in Beijing Shougang Exhibition & Convention Center. Coinciding with the Rehabilitation International (RI) Centennial Anniversary Celebrations, CR EXPO 2023 has attracted many guests, scholars and professional visitors both at home and abroad, presenting to the world the innovations China has made in rehabilitation and assistive devices. The three-day exhibition has been warmly received by exhibitors and visitors and served as a popular platform for them to exchange ideas and draw inspiration.

Praise from Exhibitors

There was a continuous stream of visitors coming to the exhibition, and we have served waves of customers showing interest in our products. The exhibition is a perfect platform for us to not only discuss current trends in the industry with peers, but also see the latest products and technologies, which is a clear example of a resilient and vigorous development in the industry.

Vice President from BOIN Hearing Technology (Shanghai) Co., Ltd. **Hu Yongfu**

This is the first time the CRRC has participated in CR EXPO. We have yielded a huge harvest, including preliminary agreements on cooperation with many overseas companies. Meanwhile, the exhibition has brought together the masses, marketing channels, cooperative parties and governments, allowing us to discover the development opportunities of the health and care industry.

Wang Baozhen General Manager from the Care Division of the CRRC

Praise from Experts and Visitors

As the main forum of this session of our academic conference is New Technology Development of Children Rehabilitation, experts have given demonstrations concerning its status quo, directions and common rehabilitation technologies. It has provided a great platform for practitioners to exchange ideas and learn from each other.

Pang Wei

Chief Physician and Secretary of the CPC Committee of the Third Affiliated Hospital of Jiamusi University, Professor and Graduate Student Mentor

Other than communication rehabilitation practitioners, medical service providers and universities, there are many speech therapists and ordinary people participating in the forum, which is a pleasing sign of greater attention paid to the sector. The forum not only has served as a guide to the work of professionals, but also has popularized the knowledge of the sector.

Director of School of Communication Science, Beijing Language and Culture University / Director of Communication Disorders Rehabilitation Professional Committee

Gao Liqun

The exhibition has witnessed the release of various new products and the promotion of new technologies and theories. During these three days, I have met many suppliers and we will work on details to achieve smooth cooperation in the near future.

Cui Xiaolong

Business Manager of Qianxi Group Co., LTD/
Government Sourcing Manager

We have been the bridge between disabled persons and companies all along. In CR EXPO 2023, we were allowed to learn and experienced some high-tech products, such as brain-computer interfaces, smart print based on cloud computing and eye tracking systems. It gives us a more comprehensive understanding of the latest products and trends in the rehabilitation aids industry and inspiration for more accurate matchmaking.

Party Secretary and Director of Beijing Technical Center for Rehabilitation Aids

Qiao Weisheng
